

ANTENNA DROP LOCATION – SENIOR CENTER
266 Escuela Avenue
Thomas Guide: 811 G4

WHERE TO ENTER:

Photo SC-1 shows the front of the Senior Center. Enter the parking lot off of Escuela. As you approach the Senior Center you will see the view in SC-1. If you continued around to the left of the building, you will see a courtyard that is surrounded by the building. There are also entrances from the courtyard. Until you get used to the building, enter through the doors shown in SC-1. Those doors should always be unlocked during business hours or if the center were to be used as a shelter.

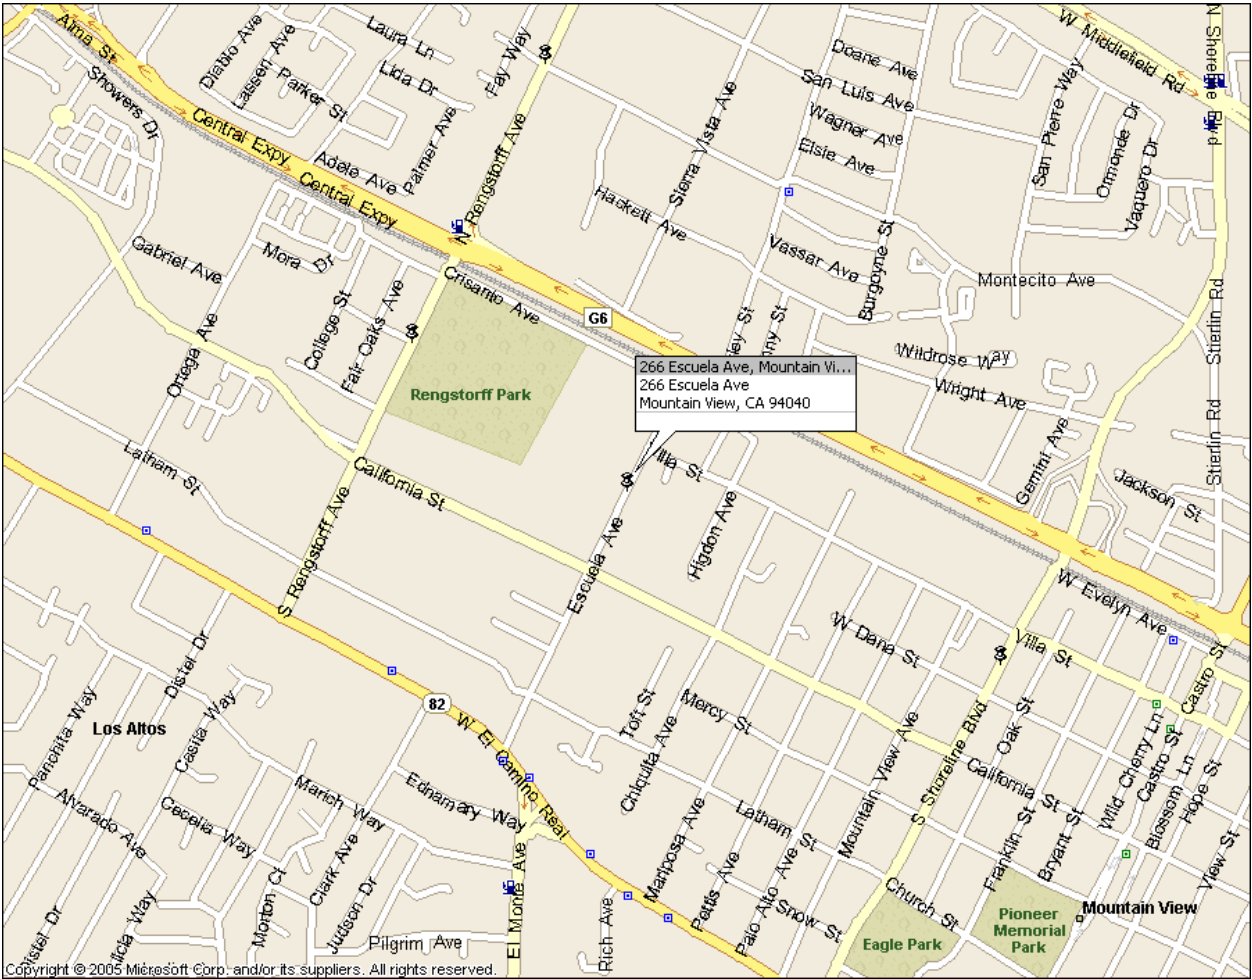

LOCATON OF THE CABLE DROP

After entering the Senior Center, you will see the main desk immediately to your right as shown in SC-2. The antenna connection is located behind that desk at the left end of the wall that is behind the desk and is indicated in SC-3. A close up of the antenna connection is shown in SC-4, next to the printer. There is no clipboard container, so you will need to bring your own set of forms (213s, 309s, etc.)

WHERE TO SET UP YOUR RADIO

Set up your radio on the desk to the left of the antenna connection location. If you find you are in the way behind the desk, you can work the radio from outside the desk. Make sure you have batteries for your radio and it would probably be helpful to have a headset or ear phones since it might be noisy.
